

Figure 1 consists of 12 bar charts, labeled (a) through (l), each representing a different fish species. The species are: (a) Atlantic croaker, (b) Striped bass, (c) Weakfish, (d) Spot, (e) Blue crab, (f) Rockfish, (g) Atlantic silverside, (h) Atlantic herring, (i) Atlantic menhaden, (j) Atlantic bluefish, (k) Atlantic tomcod, and (l) Atlantic sand lance. Each chart shows the percentage of the total catch for that species from 1990 to 2001. The y-axis for all charts is 'Percentage of total catch' and ranges from 0 to 100. The x-axis is 'Year' and ranges from 1990 to 2001. Each bar represents the mean percentage for that year, and the error bars represent the standard error. The data shows varying trends for each species over the 12-year period.
